

Ayaan A. Syed

Austin, TX | therealayaan9876@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building production systems at H-E-B Digital and delivering end-to-end features across frontend, backend, and cloud infrastructure. Skilled in React, TypeScript, and Python with proven ability to design RESTful APIs, implement OAuth integrations, and deploy services on Google Cloud. Experienced with SQL and NoSQL databases, CI/CD pipelines, and Agile workflows. Passionate about writing clean, testable code and collaborating cross-functionally to ship reliable, scalable solutions in a fast-paced retail technology environment.

EXPERIENCE

H-E-B Digital Technology — Data Infrastructure

June 2026 – Present

Software Engineering Intern

Austin, TX

- Delivered 130+ story points in 6 weeks as sole developer on a full-stack internal tool (Python backend, React frontend) that automates BigQuery ingest strategy recommendations across thousands of tables, reducing unnecessary full-load reprocessing costs
- Designed and implemented a nightly Cloud SQL metadata sync pipeline caching table statistics (row counts, byte sizes, schemas), eliminating real-time BigQuery API lookups and measurably reducing dashboard page-load latency
- Built OAuth-integrated GitLab API feature that programmatically creates Merge Requests from UI-generated YAML diffs, closing the loop from discovery recommendation to production configuration change
- Collaborated across Data Engineering, Platform, and UX teams in Agile sprints using Jira and Confluence; deployed services on Google Cloud Run with CI/CD pipelines

Klein Sports Performance, LLC

September 2024 – August 2025

AI Research Lead Intern

Austin, TX

- Led AI research for a fitness app, developing machine learning algorithms that recognize 100+ workout types
- Built full-stack features using Python (FastAPI) backend and Streamlit dashboards for user-facing analytics
- Developed ChatBot system referencing 20+ research studies to deliver personalized fitness insights via RESTful API
- Integrated Redis caching to improve backend response times for frequently accessed workout data

PROJECTS

Watermark Discovery Dashboard | Python, React, Cloud SQL, Google Cloud Run, GitLab CI/CD, OAuth

2026

- Delivered 130+ story points in 6 weeks building a full-stack tool (Python + React) that recommends incremental vs. full-load ingest strategies across thousands of BigQuery tables, collaborating with Data Engineering, Platform, and UX teams via Jira sprints
- Implemented nightly Cloud SQL sync pipeline and caching layer that eliminated real-time BigQuery lookups, reducing dashboard latency; built OAuth-integrated GitLab API to programmatically create Merge Requests from UI-generated YAML configuration diffs
- Deployed to Google Cloud Run with CI/CD pipelines and authored architecture diagrams presented to the engineering team

MindSight — Healthcare AI Platform | React, Python, FastAPI, PostgreSQL, AI Integration

2025

- Built full-stack platform with React frontend and Python/FastAPI backend serving RESTful APIs for medical data analysis
- Integrated AI models (DeepSeek-R1, Hugging Face) to process real EEG datasets; designed PostgreSQL schema for structured data storage

Lone Star Aisle — API & Platform Integration Tool | Python, REST APIs, OAuth/OIDC, YAML

2026

- Authored comprehensive API integration reference covering authentication (OAuth 2.0 + PKCE), inventory, and coupon endpoints with working examples across multiple environments
- Documented platform architecture patterns distinguishing external API gateway routing from internal Kubernetes service paths, serving as canonical onboarding resource for engineering teams

EDUCATION

St. Edwards University

August 2022 – December 2025

Bachelor of Arts in Computer Information Science

Austin, TX

Relevant Coursework: Data Structures, Algorithms, Software Engineering, Web Development, Database Theory, Design Patterns

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript/ES6+, HTML5, CSS3, Responsive Design

Backend: Python, FastAPI, Flask, Node.js/Express, Java, RESTful APIs, Microservices, OAuth/JWT

Databases: PostgreSQL, Cloud SQL, MongoDB, SQLite, Schema design, Query optimization

Cloud & DevOps: Google Cloud (Cloud Run, BigQuery, GCS), Docker, CI/CD Pipelines, Git/GitHub/GitLab

Tools & Practices: Jira, Confluence, Agile/Scrum, Code Review, System Monitoring, Linux

Certifications: Microsoft Azure AI Essentials Professional Certificate (May 2025)

HOBBIES & INTERESTS

Animal Volunteering, Coffee Roasting & Sciences, Pickleball, Exploring Music & Cinema
